GREENPLANET

ALL OUR PRODUCTS CONTAIN **PINE SEEDS**
THE TREES most commonly used
in our climate zone for **the production**
of PAPER AND WOODEN articles

1 one adult pine "produces"
oxygen necessary
for the lives of three people

1 one tree produces as much
oxygen a year as a person consumes
in 2 years of life

1 one hectare of forest absorbs
as much CO_2 as 1 hour as
200 people release it

GROWNOTEBOOK

ECO-FRIENDLY inside blocks can be made of:

FSC-CERTIFIED PAPER

It's a product of responsible forest management, and it means that the trees, from which it was created, were obtained from legal sources, without violating human rights and nature. FSC is the only certification system supported by major ecological non-governmental organizations like WWF and Greenpeace.

The bleaching process used to whiten paper carried out without the use of chlorine gas. It is uncoated, opaque and has excellent parameters for printing.

RECYCLED PAPER

Is made out of 100% waste paper scrap from FSC certified paper. It is uncoated, opaque, has a matt surface and smooth texture characterized by high quality for printing.

Recycling 1 ton of paper saves:

|		
4115 l of water	**31** kg CO_2	**382** kW h of energy
260 kg of wood	**158** kg of waste	
STONE PAPER

A type of paper that is made out of calcium carbonate 80% (limestone) and bio-polyethylene resin 20% (HDPE). This high flexible and water resistant paper needs 1/3 less ink than classic paper, while maintaining the intensity of the colors.

Recycling 1 ton of paper saves:

200 000 l of water	**75** kg CO_2	**477** kW h of energy
9000 kg of wood	**19** kg of waste	

optional inside-layouts:
• **graph**
• **line**

• **dotted**

• **blank**

A5 (130x208 mm)

• FSC-certyfied paper: **192 pages, 80 g/m²**
• recycled paper: **192 pages, 80 g/m²**
• stone paper: **144 pages, 144 g/m²**

PLANTING instructions

1 Soak your seeds in lukewarm water for 24 h. Plant it shallowly in a pot with moist soil and sand (3:1).

2 Gently sprinkle the top with a sand, spray with water.

3 Place the pot in a shady place. When the seeds begin to germinate (10-20 days), give them access to light. Moderate amount of water required. avoiding excessive exposure.

4 Over 2 years of growing in a pot, transplant seedlings into the open ground during the fall (in accordance with applicable laws).

PINUS nigra
GREENPLANET

WHY BLACK PINE TREE?
Black pine tree is the most common paper and furniture material in our region.

PINE TREE SEEDLING - DPN
(Pinus Nigra) in paperpot container

10 cm
25 cm

YOU SHOULD KNOW:

- black pine is a **fast-growing** tree, reaches up to **40 m** in height
- It is a basic source of wooden furniture and paper pulp
- resistant to salinity and pollution, therefore it is suitable for planting in cities and roads sides
- pile root system is perfect for strengthening dunes and slopes
- shapes well and tolerates pruning

HOW PAPER IS MADE ?

1 TREE = 50 KG of PAPER

1 first you need to prepare paper pulp, i.e. crush the raw material, generally wood

2 paper pulp is mixed with water, glue, inks and other additives, then fulling

3 combine the wet fibers and compress into webs or sheets

4 after drying and cooling, the paper is ready for use

RENEW THE WORLD OF TREES

Be eco! Plant your tree and help planet to fight CO_2

OXYTree GREENPLANET

10 X PRODUCES **MORE** O_2

than other leafy trees!

ⓘ plant seedling **in accordance with applicable laws place**

OXYTREE SEEDLING - DOXT
(Paulownia) **placed in paperpot container**

YOU SHOULD KNOW:

• oxytree is extremely fast growing. Six years after planting it reaches 16 m in height and 35 cm in diameter

• well adapted to different climatic conditions and soil

• it needs huge amounts of carbon dioxide for the rapid growth and produces oxygen in photosynthesis

• grow again after cutting. Produces 4 times more wood than other native species in 20 years

• is widely used in furniture industry - wardrobes, tables, chairs

• thanks to lightness and water resistance it has been appreciated by producers of yachts, ships and surfin boards
OXYTREE PLANTS PROTECTS THE ENVIRONMENT AND SIGNIFICANTLY IMPROVES AIR QUALITY

OXYTree GREENPLANET planting requirements

• loose, well-drained soil
• soil pH in the range of 5.5-8.9
• ground water below 2 m
• non-flooded and non-wetland areas
